

Mansion, English Cottage Style

Client

Private Owner

Dates

Dec 2001 to Dec 2003

Project Type

Single Family

Description

This large 10,000 square foot (925m²) two level house features a formal entry and dining room, home office, indoor swimming pool, large recreational room and a three-car garage.

The ?L? shaped floor plan allows for a large patio at the back of the house, which connects the living quarters with the garden and swimming pool. The extensive use of sloping roofs, gables, dormers, bay windows and turrets makes it possible to achieve the English cottage look desired by the client while at the same time diminishes the scales of the building.
