

Flood Hazard Management Study

Client

Fraser Basin Council

Dates

May 2007 to Jun 2008

Project Type

Area Planning

Consultants

Ministry of Environment, Union of British Columbia Municipalities

Description

Province wide evaluation of the available flood hazard management tools resulting from legislative changes in 2003/2004. Development of detailed survey for provincial and local government officials as well as private consultants that work on flood hazard management issues. Documentation of results including conclusions and future action to mitigate flood hazard risk.
