**Project:**

Pine Beetle Economic Impact Analysis

**Client:**

Ministry of Agriculture and Lands

**Project Type:**

Government

**Description:**

An analytical baseline statistical report was created drawing upon data and information from government, business and community sources. Current and historical socio-economic trends were identified in the four regional districts most impacted by the Mountain Pine Beetle epidemic: Bulkley-Nechako, Cariboo, Fraser-Fort George and Thompson-Nicola. This was compared to Comox-Strathcona Regional District and overall B.C. statistics and trends. The report also highlighted strengths and challenges and offered recommendations for socio-economic development.

**Dates:**

Mar 2006 to Nov 2006

**Consultants:**

Bulkley-Nechako, Cariboo, Fraser-Fort George and Thompson-Nicola Regional Districts
