The Arlington Group was retained by the City of Merritt to complete a cultural mapping project for the City. The three main elements of this project were to:

- define and identify the existing Arts, Culture and Heritage resources of the City of Merritt,
- identify strengths, weaknesses, gaps and opportunities in the inventory as well as potential synergies
- graphically represent the cultural inventory of Merritt.

This project included hosting workshops with a broad cross-section of arts, cultural and heritage groups and extensive documentation of these resources. The result was the creation of a thematic and interactive map.
